Why choose our Digital Marketing Institute in Ludhiana?

1. We are known by hundreds of students and business owners to offer the best online trade marketing courses in Ludhiana and Punjab.
2. Our expert instructors explain why advertising is important for advertising development and teach you how to create an impressive campaign.
3. You will develop a professional digital marketer portfolio working on live industry projects.
4. We include the hands-on session in Adobe Illustrator Photoshop, which gives you a skill to make a compelling scene for marketing.

What will you learn in a digital marketing course in Ludhiana

1. **SEO and online marketing strategies**
   We start with the main aspects of SEO and online advertising. You will understand how search engines work, how to customize your website for better ranking, and why advertisement is important to reach your target audience. We also focus on social media marketing, content creation and email marketing to ensure that you have a full skill set.

2. **Graphic design skills for digital marketing**
   Design plays an important role in online marketing campaigns. This is why we teach Photoshop and Illustrator deeply. You will learn how to use Adobe Illustrator and Photoshop to make professional graphics. Our instructors explain the difference between Illustrator and Photoshop and guide you through the examples of the real world of Illustrator vs. Photoshop to help you decide which equipment is best for specific tasks.

By the end of this module, you will be confident of using Adobe Illustrator Photoshop to create banners, social media posts and website visuals that attract and give results.

3. **Programming fundamental (bonus module)**
   We also include a programming fundamental module to give you a competitive edge. You will be introduced to the python token, learn about the token in the python, and understand what is a token in the python with clear examples. This module will also explain how a token in Python works in real - life coding conditions. If you plan to automate tasks or work with developers in the future, these skills are beneficial.
